TRIBUTES ACCORDED MULHOLLAND'S MEMORY

AT DEATH NOTED

A pail of sadness settled on the Water Palace yesterday when it became known that William Mulholland, "grand old man" of water conservation in the west, builder of the Los Angeles aqueduct, and one of the moving spirits of the Colorado river-All American canal project, had died.

Although the great diorama in the Water Palace, depicting the two great aqueduct systems soon to be linked together at Los Angeles, does not mention William Mulholland or any other individual, the men most familiar with the mighty works of engineering and most appreciative of the vision that made possible the thriving communities of southern California, have always regarded Mulholland as the one man most entitled to honor.

entitled to honor.

"But for Mr. Mulholland," said Jess Worley, Imperial valley representative at the Water Palace, "I doubt if there would have been any Boulder dam or Colorado river aqueduct. He showed the world, when he built the Los Angcles aqueduct many years ago, that what a man can imagine he can accomplish. He brought water 250 miles over the mountains and deserts to a great metrop. "tan community." When the idea was broached of damming the Colorado and bringing water to southern California by conduit and ditch from far-away Nevada, Mulholland said, "Sure, why not? It is entirely feesible. The water is there. We need it here. The engineering problems are simply matters of detail."

H. Arthur Price of the Los Angeles water bureau said:
"No chapter of western history carries a more graphic tribute to human endeavor and persistency than the history of the Los Angeles aqueduct conceived and personally engineered by William Mulholland. His vision, courage and ability were unsurpassed."

Roy H. Serivner of the Metropolisan water district also expressed his entitled to honor.
"But for Mr. Mulholland," said

Roy H. Scrivner of the Metropoli-tan water district, also expressed his profound sense of grief and loss in the death of the aged water conservator:
"All of southern California owes

"All of southern Californiz owes him a debt of gratitude," said Scrivner. "The benefits of his work will be felt for generations yet to come." Another tribute to the memory of the famous engineer was added by W. S. Calberg of the Los Angeles department of water and power: "When future histories of southern California are written they will

ern California are written, they will give no greater credit to any one for finer vision, bigger ideas or larger ability and energy than to William Mulholland. His work is an outstanding chapter in California OLD TREASURES ON DISPLAY FOR VISITORS
